

SVMIC Medical Practice Services

The practice of medicine has evolved into a highly complex business enterprise, involving everything from complicated fee schedules and reimbursement policies to ever-changing state and federal laws, all on top of typical staffing and operational challenges. We work with physicians, practice executives, and other members of your staff to aid in traditional consulting areas and are available to provide you with ongoing support virtually, or in your practice location. These services are included in the premium you already pay and are provided at no additional charge.

Custom Practice Services

Whatever business challenge your practice is facing, chances are high that someone on our team has the expertise to assist you in navigating it. We are available to answer your questions, provide individualized consulting, education and training through various means, and assist with practice management and risk issues via phone or email.

Experienced Consultants

Our team of consultants hold a variety of certifications including medical practice management, coding, compliance, and human resources. All are Fellows in the American College of Medical Practice Executives. Together they have more than 150 combined years of experience in the business of healthcare.

Resources and Training

SVMIC's member-only portal, Vantage®, houses critical information on a variety of clinical and healthcare management topics, as well as sample forms and letters. Our education offerings include well over 50 on-demand courses. In addition, we host virtual and live workshops for physicians and practice managers.
